

# Check

## All the security features on the banknote.

**LIFT**

Watermark showing a falcon's head, along with the denomination number in Arabic, becomes visible when the banknote is held against the light.

# Check All the security features on the banknote.

**TILT**

**The spark mark exhibits a color-shifting effect when the banknote is moved or tilted.**

# Check All the security features on the banknote.

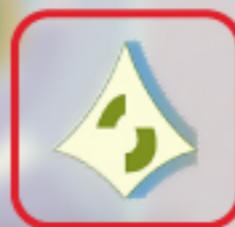

The security thread changes color, showing text, decorative designs, and a denomination number, repeatedly, when the light passes through the reverse side of the banknote.

## All the security features on the banknote.

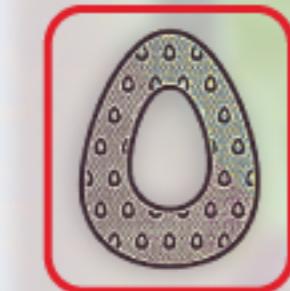

### LOOK

Partially printed or incomplete shapes clearly appear to form the denomination number when the banknote is viewed against a light source.

## Check

All the security features on the banknote.

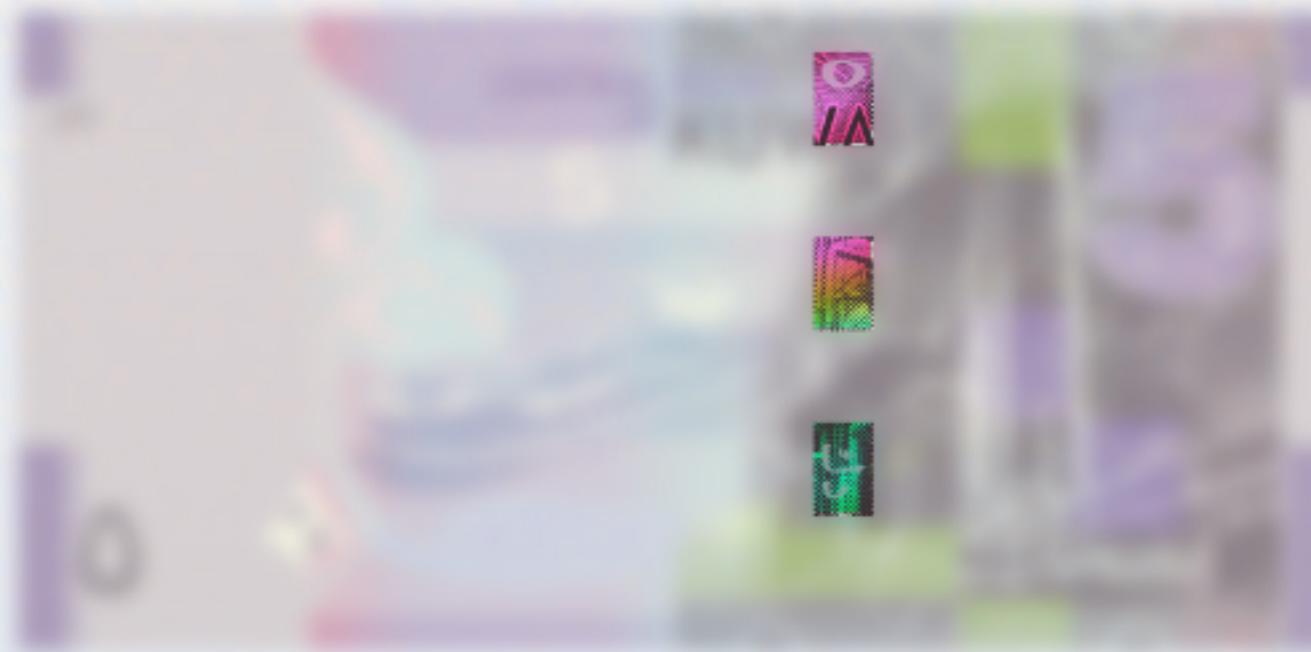

The raised intaglio printing of the denomination, visible on both the obverse and reverse sides of the banknote, together with tactile markings designed for the visually impaired, can be clearly felt by touch.
