**Fund Manager Comment**

Apr'23 was a month that reflected strong economic resilience globally despite stronger signals of banking distress, especially in the developed markets due to the unprecedented rate hikes in the US front. Inflation continued to head lower, albeit not fast enough to satisfy the policymakers. The conviction over a recession in the near vicinity is more substantial than before, and many expect a halt in the hawkish behavior of the US policymakers before things get out of hand.

During March, US-10 Year Treasury rate moved lower to 3.42% from 3.47% - keeping low due to flight to safety over recessionary fears. The yield curve inverted marginally during the month with 2-10 gap ended almost flat at c.-58 bps. The consensus is that Fed would do one last hike in early May before heading to a pause.

During the month, Brent ended almost flat at USD 79.54 despite moving higher along with the OPEC cuts. Regional IG and HY space remain favorable to their global counterparts and will continue attracting flows from yield-seeking investors.

QNB MENA Debt Fund after being launched in 2017 has paid 11 coupons. We remain focused to take advantage of the opportunistic trades apparent in the market. The fund manager will maintain a lower duration than the benchmark duration until a satisfactory normalization of policy rates and a sustainable inflation outlook is reached. Assets of the Fund are satisfactorily deployed as per the investment guidelines and also in-line with the selected benchmark which the fund intends to outperform in the longer run.
